#### SKYNET TO DEBUT NEXT GENERATION WEARABLES AT LEADINGAGE EXPO

**Tampa Bay, FL:** Skynet Healthcare Technologies, a leading provider of emergency call and real time location system (RTLS) in senior living communities, will be debuting the newest versions of its growing line up of wearables at the LeadingAge 2017 Conference and Expo in New Orleans on October 30.

“Our new versions include pendants and bracelets with push button call for help features,” stated Skynet CEO Martin Rokicki. “We listened to our clients and responded to their requests to add a pendant to our line. And we’ve added a fall detection feature so that staff at senior living communities can respond quickly to falls, which leads to better outcomes for the residents.”

The Tampa Bay-based technology company will be displaying the new items and demonstrating the entire Skynet system during the Expo from October 30 – November 1.

**About Skynet Healthcare Technologies, Inc.:** Headquartered in Tampa Bay, FL, Skynet Healthcare Technologies delivers smart technology solutions to the senior living market. Skynet provides emergency call, real time location system (RTLS), and technology partnership to enhance resident safety and provide better analytics for communities.
