5 Years in Business! Skynet Healthcare Technologies Announces 5th Anniversary

PALM HARBOR, FL, April 15, 2018 – Skynet Healthcare Technologies announced its 5th Anniversary in business, as the premier life safety product and services company for the senior living care market. What began as a dream to help seniors achieve a safer and more dignified lifestyle within senior living communities, has become a reality. Skynet will be in over 75 communities across the US and Canada by the end of this year.

“It makes me proud to announce that we have crossed another milestone with our 5th year in business this month,” says Martin Rokicki, Skynet CEO. “I want to take this occasion to thank our employees for their hard work and dedication to our customers. Without the support of our excellent team, we would not have gotten this far in innovating and deploying a new technology for this market.”

We are also grateful to our clients and customers who trusted in us to help them provide a safer, more efficient environment in their communities, with our emergency call, fall detection and Real Time Location System (RTLS). Their demands, challenges and feedback have pushed us to improve our product and technology year over year. Our success story remains incomplete without the support of our clients and customers. Not only have they made us a part of their lives, but they have also spread the word about Skynet faster and in a better way than any of our own promotions ever could. Thank you and we look forward to the next five years!

About Skynet Healthcare Technologies, Inc.
