

# Skynet Care Center

## Smart Community Dashboard

A full featured extension to the Skynet RTLS System, Care Center allows you to easily check analytics and gain valuable insight on any Skynet managed event or activity within your community. From alerts and resident activity to staff efficiency and community engagement, all events and metrics are easily accessible for reporting and in-depth review directly from the Care Center Dashboard.

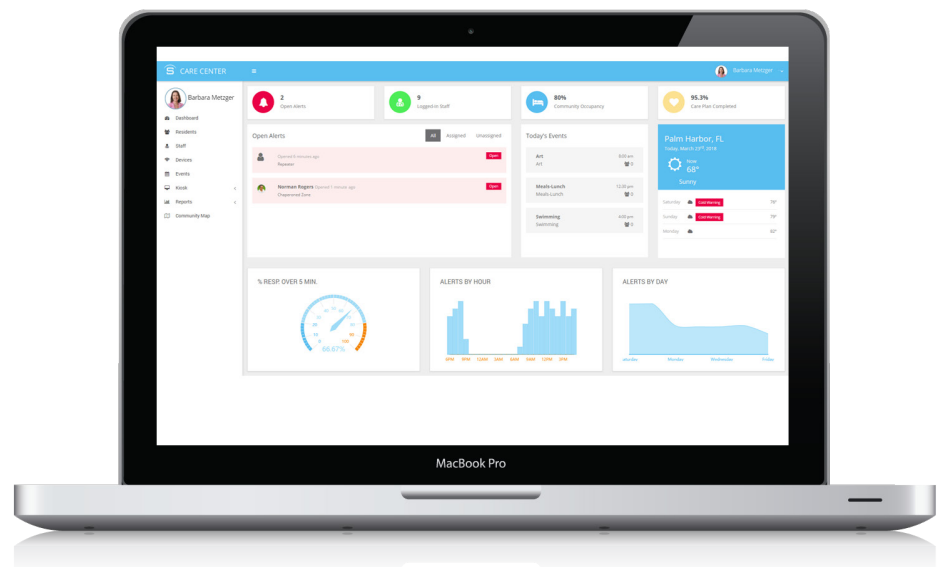

## Key Insight Metrics

- Alert response times
- Open and assigned alerts
- Ratio of Staff to R residents
- Alert % over a specified time
- Alerts per hour
- Alerts per day

## Community Management

- Calendar events
- Resident care plans
- Visitor Kiosk logs
- Reports
- Weather
